EDUCATION

University of South Florida

Bachelor of Science in Cybersecurity, Minor in Entrepreneurship

Tampa, FL

Aug. 2022 – May 2026

EXPERIENCE

IT Asset Assistant (OPS)

University of South Florida IT

June 2026 – Current

Tampa, FL

- Managed inventory and used asset management systems.
- Oversaw documentation for asset distribution and tracking.
- Handled asset deliveries and receiving processes.

Database and Outreach Intern

GenCLEO

Jan. 2026 – May 2026

Tampa, FL

- Utilized communication systems that rely on database queries and data retrieval, as well as organized, updated, and analyzed data to support outreach initiatives and reporting activities.
- Assisted in the design and development of databases for contacting members
- Participated in recruitment and outreach initiatives on USF campus.

Project Management Team Student Assistant

University of South Florida IT

Jan. 2025 – Present

Tampa, FL

- Assisted the Audio-Visual project management team, maintained asset and inventory systems, prepped and staged AV projects, supported logistics and deliveries, performed on-site system installations, and applied space data management tools.
- Used Jira to support project management workflows, track and resolve issues, manage task progress, and assist with inventory oversight.

Student Audio Visual Technician

University of South Florida IT

Jan. 2024 – Jan. 2025

Tampa, FL

- Performed system diagnostics and troubleshooting, provided technical support to faculty and staff, and delivered clear communication in professional academic settings.
- Troubleshoot and resolved technical issues with computers, webcams, speakers, document cameras, monitors, and lapel microphones to ensure seamless operation.
- Maintained upkeep of computers, classroom equipment, and printers across campus

PROJECTS

Proxmox Hypervisor Hardening and Secure Virtualization Environment | *Linux*

Spring 2026

- Built a virtualization platform from bare metal by installing and configuring Proxmox VE on dedicated hardware.
- Hardened the Debian-based hypervisor according to Center for Internet Security (CIS) Level 1 benchmarks through system auditing and configuration remediation.
- Managed package installation, service configuration, and system files to establish a secure and maintainable virtualization environment.

Veterinary Lab Database System | *SQL*

Spring 2024

- Designed and implemented a relational database in Oracle SQL to manage clients, employees, tests, orders, and results with primary/foreign key constraints.
- Developed optimized queries, indexes, and reporting views (e.g., orders by city, reporting lag, anniversary discounts) to support business insights and performance.
